Biomedical Engineering | Neurotechnology | Rehabilitation Engineering

Fredericton, NB, Canada +1 (647) 864-6740 shreyanshsheth5@gmail.com linkedin.com/in/shreyansh-i

RESEARCH PROFILE

Biomedical engineering graduate with advanced training in biomedical engineering and regulatory affairs, seeking a funded research master's as preparation for doctoral study. Research interests centre on neurotechnology, neurorehabilitation, rehabilitation engineering, and biomedical signal processing, with project experience spanning biosignal analysis, assistive systems, and sensor-based diagnostics.

EDUCATION

Master of Science in Regulatory Affairs Northeastern University	2021–2023 GPA 3.28 / 4.00
Master of Technology in Biomedical Engineering Vellore Institute of Technology, Vellore	2020–2022 GPA 3.56 / 4.00
Bachelor of Engineering in Biomedical Engineering Government Engineering College, Gandhinagar Gujarat Technological University	2016–2020 GPA 3.08 / 4.00

RESEARCH INTERESTS

Neurotechnology • Neurorehabilitation • Rehabilitation Engineering
• Biomedical Signal Processing

SELECTED RESEARCH & ENGINEERING PROJECTS

Lower-Limb Exoskeleton for Scissoring Gait Developed a theoretical assistive-system design focused on lower-limb rehabilitation and gait support.	Pattern Recognition in ECG Signals through Benford's Law Explored Benford's law as a pattern-recognition approach for electrocardiogram signal analysis.
P300 Signals Review Reviewed P300 event-related potential research and presented the work at ICAICTSEE-2020.	EEG-Based Stress Identification System Used electroencephalography signals and LabVIEW in a system for identifying stress-related patterns.
Smartphone-Sensor Diagnostics Contributed to sensor-based diagnostic research as a Research Assistant at IIIT Raipur.	Automated Medicine Dispenser Built a Raspberry Pi and Python-based system to support scheduled medicine dispensing.
Fingertip Motion Replicating Rehabilitation System Developed a rehabilitation-oriented concept for replicating fingertip motion.	

Shreyansh Sheth

Academic & Research Curriculum Vitae

RESEARCH-RELATED EXPERIENCE

Team Lead — Regulatory Affairs Co-op

Apr–Jul 2023

Breegi Scientific Inc. | Boston, MA

- Led three peer students in a four-person final-semester, hands-on regulatory affairs project.
- Managed project coordination and team delivery for work supporting a Phase I clinical trial involving a neonatal incubator.

Research Assistant

May–Aug 2021

International Institute of Information Technology, Raipur | Raipur, India

- Contributed to research on diagnostic applications using smartphone sensor data.

Biomedical Service Engineer

Jun 2020–Jul 2021

Sterling Hospitals | Ahmedabad, India

- Supported biomedical equipment service activities in a hospital environment.

TECHNICAL SKILLS

Analysis MATLAB (proficient), R

Programming Python

Engineering Tools LabVIEW, COMSOL

Focus Areas Biomedical signal processing, EEG, ECG, sensor-based diagnostics, assistive systems

SELECTED CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- g.tec BCI & Neurotechnology Spring School, 2021
- TCPS 2: Course on Research Ethics
- Managing Conflict of Interest in National Pharmaceutical Systems — World Health Organization, 2023
- Human Anatomy Specialization — University of Michigan
- Mechanical Ventilation for COVID-19 — Harvard Medical School
- The Arduino Platform and C Programming
- MATLAB Masterclass
- COMSOL training
- Google Project Management Specialization

CONFERENCE PRESENTATIONS

P300 Signals Review

ICAICTSEE-2020

EEG-Based Stress Identification System

ISC-2021

LANGUAGES

Fluent: English, Hindi, Gujarati

Learning: French (TCF Canada)
